WHAT THIS BLUEPRINT DOES

This is one unified system that combines Smart Profits Trader's Copy Trading engine with a disciplined, milestone-based Growth & Withdrawal Plan. It gives anyone — regardless of trading experience or starting capital — a clear, step-by-step path from their first deposit to a serious personal trading capital base.

The philosophy is simple: build a buffer, then let every stage compound fully before withdrawing exactly half of what was gained. The other half stays in the account as new working capital. This way the account keeps growing even as real income is taken out along the way — and eventually the capital itself becomes large enough to live on without needing to force withdrawals.

START FROM WHEREVER YOU ARE

\$200 — Join Copy Trading. Compound everything, touch nothing, until your balance reaches \$500.

\$500 — Start at the Buffer Building step (Milestone 1) of the Growth & Withdrawal Plan below.

\$1,000 or more — Enter directly into the full Milestone Plan from Milestone 2 onward.

\$200

Minimum Start

10

Milestones to \$100K

1%-5%

Daily Target (long-term)

\$100K

Capital Goal

THREE WAYS IN

Everyone follows the same roadmap — you simply join at the point that matches your current capital.

Entry Capital	Where You Start	What You Do
\$200	Copy Trading (pre-milestone)	Compound 100% of profits. No withdrawals until you reach \$500.
\$500	Milestone 1 — Buffer Building	Compound only, no withdrawals, until balance reaches \$1,000.
\$1,000+	Milestone 2 onward	Full Growth & Withdrawal Plan: compound to each milestone, withdraw half the gain, repeat.

COPY TRADING — COMPOUNDING PROJECTION (\$200 START)

What happens when a \$200 Copy Trading account reinvests 100% of your 70% profit share every month, with no withdrawals. This is how \$200 grows into the \$500 needed to enter Milestone 1.

Month	Balance (Start)	10% Profit	Your 70%	Balance (End, Reinvested)
1	\$200.00	\$20.00	\$14.00	\$214.00
2	\$214.00	\$21.40	\$14.98	\$228.98
3	\$228.98	\$22.90	\$16.03	\$245.01
4	\$245.01	\$24.50	\$17.15	\$262.16
6	\$280.51	\$28.05	\$19.64	\$300.15
8	\$321.16	\$32.12	\$22.48	\$343.64
10	\$367.69	\$36.77	\$25.74	\$393.43
12	\$420.97	\$42.10	\$29.47	\$450.44
14	\$481.97	\$48.20	\$33.74	\$515.71

By month 14, a disciplined \$200 Copy Trading account has compounded past \$500 — ready to enter Milestone 1 of the Growth & Withdrawal Plan. Note: figures assume a consistent 10% monthly profit before your 70% share is calculated; actual results vary month to month.

THE GROWTH & WITHDRAWAL ENGINE

From Milestone 2 onward, every stage follows one rule: let the account compound fully to the next milestone, withdraw exactly half of what was gained at that stage, and leave the other half in the account to keep compounding. Milestone 1 is the only exception — it is a pure buffer-building stage with zero withdrawals, so there is a stable base before the withdrawal cycle begins.

WHY HALF, NOT ALL

Withdrawing only half of each stage's growth means real income reaches you at every milestone, while the account itself never stops getting bigger. Over ten milestones this is what carries a \$500 buffer to a \$100,000 trading capital.

THE MILESTONE ROADMAP — \$500 TO \$100,000

Track capital growth, withdrawal amount, and cumulative income at every stage. Duration assumes disciplined, consistent compounding.

#	Capital Range	Growth	Withdrawal (Half of Growth)	Cumulative Withdrawn	Duration
1	\$500 → \$1,000	\$500	\$0 (buffer stage)	\$0	1 month
2	\$1,000 → \$2,000	\$1,000	\$500	\$500	1 month
3	\$2,000 → \$3,000	\$1,000	\$500	\$1,000	2 weeks
4	\$3,000 → \$5,000	\$2,000	\$1,000	\$2,000	1 month
5	\$5,000 → \$10,000	\$5,000	\$2,500	\$4,500	1 month
6	\$10,000 → \$20,000	\$10,000	\$5,000	\$9,500	1 month
7	\$20,000 → \$30,000	\$10,000	\$5,000	\$14,500	1 month
8	\$30,000 → \$50,000	\$20,000	\$10,000	\$24,500	1 month
9	\$50,000 → \$80,000	\$30,000	\$15,000	\$39,500	1 month
10	\$80,000 → \$100,000	\$20,000	\$10,000	\$49,500	1 month

Total time from \$500 to \$100,000: approximately 9.5 months of disciplined execution. Total cumulative withdrawals along the way: \$49,500 — on top of the \$100,000 compounding capital you end with.

YOUR MILESTONE MAP

Track every win. Each milestone below is a real, achievable step:

M1	Balance reaches \$500 — buffer built, Milestone 1 begins
M2	Balance reaches \$1,000 — first withdrawal cycle begins
M3	Balance reaches \$2,000 — withdraw up to \$500
M4	Balance reaches \$3,000 — withdraw up to \$500 more
M5	Balance reaches \$5,000 — withdraw up to \$1,000

M6

Balance reaches \$10,000 — withdraw up to \$2,500

M7

Balance reaches \$20,000 — withdraw up to \$5,000

M8

Balance reaches \$30,000 — withdraw up to \$5,000

M9

Balance reaches \$50,000 — withdraw up to \$10,000

M10

ULTIMATE: Balance reaches \$100,000 — \$49,500 already withdrawn along the way

THE LONG-TERM VISION

The milestone plan is not the end goal — it is how you build the capital base to get there. Once your personal trading capital is large enough, the target shifts from milestone withdrawals to a steady 1%–5% daily return, compounded and drawn from consistently. At \$100,000, that is \$1,000–\$5,000 per day in potential income — capital doing the work, without the pressure of forcing withdrawals or rushing growth.

READY TO GET STARTED?

Join at \$200, \$500, or \$1,000 — follow the roadmap — track your milestones.
